THE CARTER TREE

TABULATED AND INDEXED

The Carter Tree, in the form of a graph or chart, forty one inches by forty two inches in size, was compiled, "designed and written" by Robert Randolph Carter of Shirley (5I2aI2), copyrighted and published in 1897 by his daughter, Marion Carter Oliver (5I2aI22)

The chart is a thing of beauty and a most valuable contribution to genealogy, but it is difficult to locate any given name among its many branches and to trace its line with the intermarriages and cross connections.

The compiler of these tables has merely translated the chart into tabular form with a numerical and alphabetical index so that any one of the ten thousand individual names on the chart may be quickly found and its place in the tree located by tracing the numerical index from the main stem.

The scheme of indexing consists of numbering the children in each generation in the order of their birth. The numbering begins with the children of the immigrant ancestor. The first digit represents the child in the order of birth in the second generation. The second digit represents the child of the preceding unit in the order of birth in the third generation, and so on. Each successive digit represents the child in the order of birth in each successive generation. Lower case letters are used for numerals above nine, thus: 10 is x, 11 is a, 12 is b, 13 is c, and so on.

1401520

As an illustration, taking the name of General Robert E. Lee, we find from the alphabetical index that it has an index number 5I2x4 and that his wife's index number is 5aI2I. General Lee's line is traced as follows:

5I2x4 Robert Edward Lee, m. Mary Custis (5aI2I)
5I2x Anne Hill Carter, m. 2nd. wife, Gen. Harry Lee
5I2 Charles Carter of Shirley, m. 2nd. wife, Anne Butler Moore
5I John Carter, m. Elizabeth Hill
5 Robert Carter of Corotoman, m. 1st. wife, Judith Armistead
John Carter, first of name in America, m. 4th wife, Sarah Ludlow

Mrs. Lee's lineage is traced in the same way, as follows:

5aI2I Mary Custis, m. Robert Edward Lee (5I2x4)
5aI2 Mary Fitzhugh, m. G. W. P. Custis
5aI William Fitzhugh, m. Anne Randolph
5a Lucy Carter, m. Henry Fitzhugh
5 Robert Carter of Corotoman, m. 2nd. wife, Betty Landon

Thus two names widely separated on the chart are brought together and their lineages traced to the common stem. There can be no duplication of names or index numbers under this system and the alphabetical index serves to locate any name in the tables or on the chart. The numerical index shows the straight line descent and the collateral relationships. All names with the same number of digits in the index, differing only in the terminal digits, are brothers and/or sisters. Those that differ only in the last two digits are first cousins. Those that differ in the last three digits are second cousins, and so on. Intermarriages and cross connections are indicated by the index number in parenthesis after the name of the person appearing elsewhere in the tables or on the chart, as illustrated in the example of Robert E. Lee and Mary Custis.

No attempt has been made to extend the information shown on the chart or to bring it up to date, but it is hoped that this publication will be helpful to descendants in the various branches and that it may serve as a basis for bringing the Carter Tree up to date in all of its branches.

The chart was a labor of love on the part of Robert Rando Carter and this translation into tables and index is offered in the same spirit by Robert Isham Randolph.
